

Melika Shahghadami

Technical Artist | 3D Artist | Unity & VR

3D Modeling • Rigging • Unity Tech Art • Virtual Reality

Real-time Assets

Rigging Pipeline

Unity & VR

Skills

- 3D modeling for optimized, implementation-ready assets
- UV mapping, PBR texturing, baking, and material setup
- Rigging, skinning, and animation control system preparation
- Scene setup, lighting, and asset preparation in Unity
- Shader Graph, particle systems, and VR optimization

Software

Unity

Blender

Maya

Substance Painter

Character Creator

iClone

Photoshop

Illustrator

PureRef

Strengths

- Optimizing assets for smooth performance in Unity and VR
- Building pipelines from modeling to Unity implementation
- Experience collaborating with art and programming teams
- Technical problem-solving and fast learning of new tools

About Me

I work in 3D modeling, rigging, and technical implementation in Unity, with a focus on creating optimized assets for games, simulators, and virtual reality projects. My goal is to balance visual quality with technical performance while collaborating closely with both art and technical teams.

Work Experience

2023–2025

Aryo Soren — 3D Artist & Technical Artist

- Modeled and optimized 3D assets for simulator and VR projects.
- Set up scenes, tuned materials, and configured lighting in Unity.
- Optimized meshes, textures, and assets for smoother performance.
- Prepared assets and scenes for Meta Quest 3 testing.

2022–2023

Pishgaman Lotus — 3D Artist & Godot Programmer

- Designed environments and 3D assets for game-engine use.
- Implemented project sections in Godot and collaborated on output preparation.

2021–2022

Tarsim Dadeh — Java Programmer

- Developed and maintained parts of a Java software product.
- Debugged issues and collaborated with the team throughout the product development cycle.

Education

- B.Sc. Computer Engineering — Shahid Beheshti University (2016–2021)
- MBA — Tehran Markaz University (2021–2024)

Portfolio

Project renders and professional breakdowns are provided in the following pages.

3D Environment Portfolio

Environment Art / Cinematic 3D Render

Melika Shahghadami | Technical Artist | 3D Artist | Unity & VR

Project 01 — Environment Art

Cinematic environment render focused on atmosphere, lighting, and composition.

Project Overview

Project Title: Environment Art / Cinematic Render

This project presents a cinematic environment render focused on atmosphere, lighting, composition, and natural detail.

Role & Focus

3D Modeling

Set Dressing

Lighting

Suitable For

Portfolio

ArtStation

Job Application

Presentation Structure

For each project, the same structure can be continued: hero image, supporting angles, wireframe, clay render, and short technical notes. This keeps the portfolio organized and makes the production process easier to understand.

Hero Render

Wireframe

Clay Render

Technical Notes

Unity VR Driving Simulator

Meta Quest 3 • Day & Night Modes

Melika Shahghadami | Technical Artist | 3D Artist | Unity & VR

Night Mode

Day Mode

Two lighting modes for day and night driving scenarios.

Project Overview

This Unity project is part of a driving game/simulator prepared for the Meta Quest 3 headset. The environment includes mountain roads, tunnels, lakeside routes, buildings, signs, and two lighting modes for day and night VR driving experiences.

Unity

Meta Quest 3

VR Driving Simulator

Day / Night Modes

Road & Terrain

Role & Contribution

- Scene setup and 3D environment preparation in Unity
- Lighting and visual mood setup for day/night modes
- Preparing assets for real-time VR execution
- Building the driving route with roads, tunnels, signs, mountains, and surroundings

Technical Focus

- Scene optimization for smooth VR headset performance
- Night lighting management and road readability
- Camera/view setup for driver experience testing
- Combining environment art with driving-simulator requirements

Unity VR Driving Simulator

Night Mode Gallery

Melika Shahghadami | Technical Artist | 3D Artist | Unity & VR

Night 01 — Tunnel lighting

Night 02 — Roadside facility

Night 03 — Road curve / lamps

Night 04 — Checkpoint approach

Night 05 — Building / roadside

Night 06 — Wide night road

Night mode presentation: vehicle light readability, road depth, and spatial testing for a VR driving experience.

Unity VR Driving Simulator

Day Mode Gallery

Melika Shahghadami | Technical Artist | 3D Artist | Unity & VR

Day 01 – Tunnel approach road

Day 02 – Dirt mountain pass

Day 03 – Forest dirt road

Day 04 – Mountain route / walls

Day 05 – Lakeside speed bump

Updated day-mode renders: mountain routes, dirt roads, tunnels, stone walls, and lakeside road sections.

Unity / VR Project Summary

This set shows that the project covers not only modeling and environment dressing, but also interactive execution in Unity and VR on Meta Quest 3. The variety of daytime routes, dirt roads, tunnels, mountain environments, and real-time lighting makes the project stronger for a Technical Art / Unity portfolio.

3D Character Portfolio

Wolf Character / Blender Fur Grooming

Melika Shahghadami | Technical Artist | 3D Artist | Unity & VR

Render 01 — Side Pose

Render 02 — Front Pose

Smaller render presentation showing form, silhouette, lighting, and fur coverage.

Project Overview

Project Title: Wolf Character Asset / Blender

This project is a 3D wolf model created in Blender, using the Particle Hair system to build the fur. The focus was on body form, anatomical proportions, fur detail, and a clean portfolio presentation.

Blender Modeling

Particle Hair

Fur Grooming

Creature Asset

Lighting & Render

Role & Focus

- Modeled the main body form and wolf anatomy volumes
- Created and adjusted fur using Particle Hair in Blender
- Controlled silhouette, hair volume, and final render readability

Portfolio Value

- Demonstrates animal character modeling ability
- Shows experience with hair and fur grooming
- Suitable for Character and Creature Asset portfolio sections
