

Melika Shahghadami

Technical Artist | 3D Artist | Unity & VR | Unreal Engine

3D Modeling • Rigging • Technical Art • Unity & Unreal • Virtual Reality

Unity, Unreal & VR

Rigging & Animation Pipeline

Optimized Real-time Assets

Skills

- **Low/High Poly Modeling**, retopology and optimization of real-time assets
- **Advanced UV Mapping**, PBR texturing, baking and material management
- **Professional Rigging**, skinning and design of animation control systems (Rig)
- **Scene Layout & Lighting**, Shader Graph / Material Editor and performance optimization
- **VFX & Particle Systems**, profiling and specialized optimization for VR

Software

Unity

Unreal Engine

Blender

Maya

Substance Painter

Character Creator

iClone

Photoshop

Illustrator

PureRef

Strengths

- Specialized optimization for 72+ FPS performance in Unity, Unreal and VR
- Full mastery of production pipeline from modeling to engine implementation
- Proven experience collaborating between art and programming teams
- Creative problem-solving, fast learning and process documentation

About Me

Technical Artist and 3D Artist with 3+ years of specialized experience in the production pipeline of real-time assets for games, simulators and virtual reality. Specialized in optimized modeling, PBR texturing, rigging and technical implementation in Unity and Unreal Engine. My focus is on achieving a precise balance between high visual quality and optimal performance, especially for VR headsets such as Meta Quest 3.

Work Experience

2023–Present

Ario Soren Company — 3D Designer & Technical Artist

- Designed and optimized over 100 3D assets for simulator and VR projects
- Responsible for scene layout, material setup and professional lighting in Unity and implementation in Unreal Engine
- Optimized meshes, textures and Draw Calls by up to 40% for smooth 72+ FPS performance on Meta Quest 3
- Developed production pipeline and standardized assets for optimal team collaboration

2022–2023

Pishgaman Lotus Company — 3D Designer & Godot Programmer

- Designed modular environments and 3D assets for game engine
- Collaborated closely with development team on technical implementation and final build preparation

2021–2022

Tarsim Dade Company — Java Developer

- Developed and maintained software modules in Java and improved system stability
- Debugged, optimized code and collaborated in agile product development cycle

Education

- **BSc in Computer Engineering** — Shahid Beheshti University (2016–2021)
- **MBA — Master of Business Administration** — Central Tehran Branch (2021–2024)
